Office Circular

Kazi Farms

Date: May 03, 2018

Subject: Production Performance Bonus for early culling (Farm) - amendment

This is to inform all farm employees that according to our production system birds are normally culled on 68th weeks. There can be various exceptional reason like shed repair, shed modification, DOC market condition, etc, where Management can decide to cull birds earlier than the normal (68 weeks for broiler breeder, 75 weeks for layer breeder and 65 weeks for GP) time.

When birds are culled earlier than the normal period, the production department will provide a projected production calculation up to normal production week (68 weeks for broiler breeder, 75 weeks for layer breeder and 65 weeks for GP) and Farm's Production bonus will be calculated based on projected production given by production department.

This is to be effective immediately.
